Booster seat

Ages 8 to 12/
Over 4 ft., 9 in. tall

Safety belt

“Bee” Aware of These Safety Tips

- Read and understand booster seat installation and use instructions
- Have child safety seat re-inspected frequently by a trained professional
- Never use pillows, books, towels or other objects to boost a child
- Never use a booster seat that has been in a crash
- Never position a shoulder belt under a child’s arm or behind the back
- Never use a lap belt without a shoulder belt in a belt-positioning booster seat
- Never let children ride unrestrained, even when they fuss or complain
- Children should only use adult lap and shoulder belts when they are over 80 lbs., and over 4 ft., 9 in., and the belts fits over the middle of the shoulder
- Never place a child under 100 lbs. in front of an air bag
